

Technical Data Sheet

Planter for 2-bollard array

Front panels with customised pattern

Planter for 3-bollard array

Front panels with Islamic pattern

Design:

Modular planter system consisting of semi-circular lateral panels, flat front panels with architectural cut-outs, planter tray and frame to fit a minimal bollard array of two. Additional planter modules can be added for longer bollard runs.

Application:

The modular planter system is available for the following crash tested bollard systems:

- CityProtector M40/M50
- SSF100 Resilience
- P48 SF, P64 SF and P80 SF
- Scimitar 75/30, 75/40 and 75/50

Planter Width:

Depending on crash tested bollard system, installed with a clear gap of 1200 mm between bollards:

Bollard system	2-bollard array	3-bollard array
CityProtector M40/M50	2010 mm	3310 mm
SSF100 Resilience	2182 mm	3654 mm
P48 SF / Scimitar 75/30	2129 mm	3548 mm
P64 SF / Scimitar 75/40	2182 mm	3654 mm
P80 SF / Scimitar 75/50	2182 mm	3654 mm

Planter Height:

1073 mm

Planter Depth:

650 mm

Front Panel Design:

With Islamic pattern (standard)

With customised pattern (optional)

Colour:

Planter tray, lateral panels and front panels:

RAL 7016 anthracite grey (standard), all other RAL colours (optional)

Back panels:

RAL 7035 light grey (standard), all other RAL colours (optional)

Weight:

Approx. 215 kg per planter for 2-bollard array (without crash tested bollards)

Approx. 135 kg per additional planter module (without crash tested bollard)
